

New Premier Gulf Coast Gaming Destination Selects World-Class Surveillance System from Synectics

“We’re pleased to announce this successful system installation with Riverwalk Casino in Mississippi”

John Katnic

Vice President and Chief Operating Officer of Synectics

November 2009

Synectic Systems, Inc., leading supplier of integrated surveillance and security systems for specialized vertical markets, including its award-winning Synergy™ video management software, recently sold and installed an enterprise-class surveillance system at Riverwalk Casino in Vicksburg, MS. The new system will provide around-the-clock surveillance for its new \$100 million, 120,000 square foot casino and hotel. Built on the Mississippi riverfront, which offers spectacular views, the 22 acre property includes a five-story 80-room hotel, restaurants, VIP Club, meeting and events center and 25,000 square feet of gaming space. The first casino to be built in Vicksburg in over 14 years, Riverwalk Casino Hotel features over 800 slot machines and 20 gaming tables.

Approved by the Mississippi Gaming Commission, the new system from Synectics records over 400 cameras using the latest H.264 compression technology. H.264 encoding reduces storage requirements while still providing high quality video at the required frame rates designated by state regulations. Custom Pelco Matrix and point-of-sale integrations to Synergy™, Synectics’ video management platform, will further enhance the system’s comprehensive feature set which includes motion picture quality video, multiple layers of failover, third party integration, a user-friendly interface and comprehensive management controls.

“We’re pleased to announce this successful system installation with Riverwalk Casino in Mississippi,” states John Katnic, Vice President and Chief Operating Officer of Synectics in the U.S. “As the first of two Bluhme Group Casino projects (the other at Rivers Casino in Pittsburgh), we worked closely with our integrator Southwest Surveillance to design a reliable and cost effective solution.”
